"Work up hired hands"

The project named as workup hired hands, is social based project for needy labour. In which the client and the labour can communicate with each other through the agent. Client put their requirement to the category agent and the multiple agent gives their budget. If client and agent both are satisfied then they can directly communicate with each other and whole the data stores. In this project we include some functionality like market trends and all the activities done by the user and agent.
